Education

University of Illinois at Urbana-Champaign

Aug 2026 – May 2028

Master of Science, Statistics-Analytics; In Person

University of Illinois at Urbana-Champaign

Aug 2022 - May 2026

Bachelor of Science, Astronomy + Data Science; In Person

GPA: 3.58

- **Coursework:** Statistical Programming, Statistics & Probability, Data Science Exploration, Statistical Data Management, Data Structures & Algorithms, Computing in Astronomy

Summary

Prospective graduate student in Statistics & Analytics at the University of Illinois Urbana-Champaign with experience in predictive modeling, regression analysis, and machine learning using Python and R. Interested in applying statistical modeling to risk prediction, forecasting, and data-driven decision making.

Technical Skills

Programming: Python, R, SQL, JavaScript, Linux

Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Tidyverse, Shiny

Statistical Methods: Regression Modeling, Predictive Modeling, Probability Analysis, Machine Learning

Data Tools: OpenRefine, Data Visualization

Projects

Quantitative Research Virtual Experience Program on Forage

Oct 2024 - Nov 2024

JPMorgan Chase & Co.

Remote

- Built a logistic regression credit risk model in Python predicting borrower probability of default using loan portfolio data and FICO segmentation.
- Analyzed borrower segments and model outputs to identify **high-risk credit groups**, demonstrating predictive modeling methods used in financial risk analysis.
- Applied dynamic programming to transform FICO scores into categorical risk groups for default prediction.

Data Analytics and Visualization Job Simulation on Forage

Mar 2024 - May 2024

Accenture

Remote

- Cleaned, modeled, and analyzed 7 datasets to identify content engagement trends and generate insights for strategic decision making.
- Prepared a PowerPoint deck and video presentation to communicate key insights for the client and internal stakeholders

Experience

NASA L'Space Mission Concept Academy | Participant

May 2025 - Aug 2025

Program Analyst

Remote

- Demonstrated knowledge by following the NASA mission life cycle, up to submission of a Preliminary Design Review, for a robotic space mission
- Collaborated with multidisciplinary teams to develop mission scope, cost, and scheduling plans for a robotic space mission.
- Attended and engaged in weekly lecture taught by NASA scientists, engineers, and managers

OneWay Ministries | Internship

May 2024 - Aug 2024

Finance and Audio Intern

Aurora, Illinois

- Developed and implemented an automated workflow for reimbursement form approvals, streamlining the process for designated approvers.
- Completed an increased workload ahead of schedule, demonstrating efficiency and contributing to team productivity
- Collaborated with cross-functional teams to meet deadlines, enhancing project outcomes and gaining practical corporate experience
- Successfully managed and completed 5 major projects, involving over 100 individual tasks.

JJ Transportation | Freelance

Jul 2021 - Present

Process Improvement

Remote

- Designing and implementing new systems to reduce costs and improve efficiency by leveraging data insights.
- Digitized and organized physical data, ensuring structured storage for future analysis.
- Identified and implemented new methods to enhance workflow and data management, leading to more efficient data processing
- Developed Microsoft Word and Excel templates for Invoices and end-of-year (EOY) reporting

Illinois National Guard | Contract

Jun 2021 - Present

Air Transportation Specialist

Illinois, USA

- Processed 200+ passengers and luggage through the automated aerial port system while coordinating with flightline operations
- Communicated with loadmasters and leadership at the flightline to ensure smooth mission execution
- Training incoming airmen, ensuring they were well-informed of their duties, which fostered a culture of efficiency and teamwork
- Improving and streamlining training and on-the-job tasks using Excel, providing crucial support for military exercises
